

For the Perfect Fit

New Product Bulletin

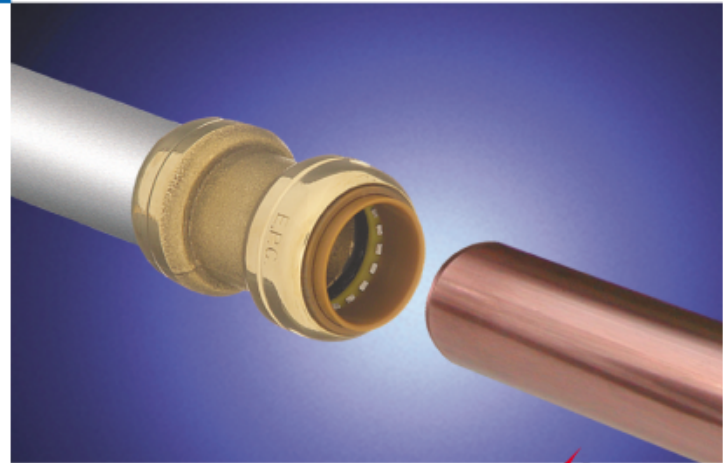

TECTITE™

WORK SMART

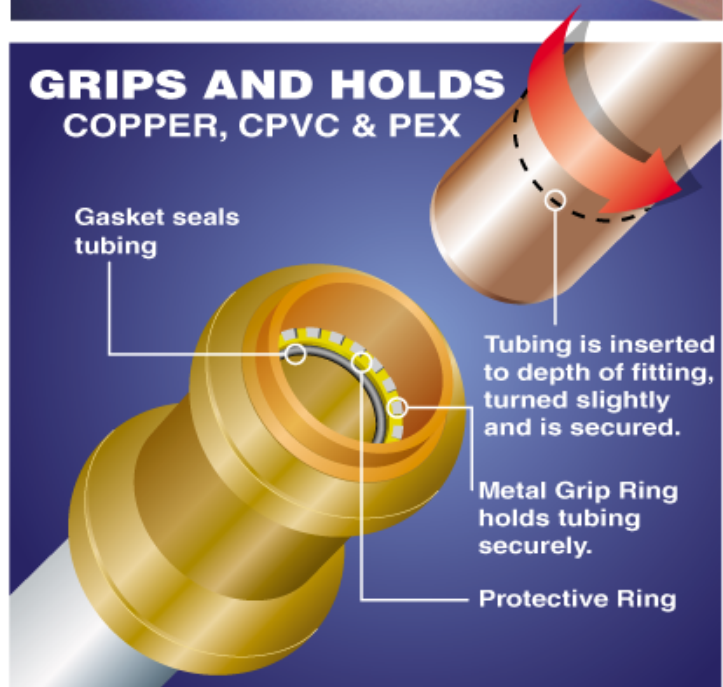

INTRODUCING

TECTITE™ – the newest addition in the EPC family of joining products

- Push Fitting - quick and easy installation with ability to demount.
- Full range of components offered in 1/2", 3/4" and soon 1".
- Works with COPPER, CPVC and PEX (requires PEX liners).
- Designed by Yorkshire Fittings.
- Tested to and passed all requirements for ICG188 & ANSI/NSF-61.
- Optional PEX liner, required for ALL PEX installations, is available as an accessory.
- The PEX liner is not designed for use with Copper or CPVC installations, as it significantly reduces flow (example: in 1/2" couplings flow is reduced by approximately 35%-45%).

GRIPS AND HOLDS COPPER, CPVC & PEX

- One of the largest U.S. suppliers of plumbing connectors since the mid 1950s.
- Producing over 3000 SKUs in all aspects of joining (solder, press & push).
- Recognized as an excellent quality manufacturer with outstanding customer service.
- Guarantees integrity of all products with a 50 year warranty.
- An Aalberts Industries Company

YORKSHIRE FITTINGS

- Originator of the brass PUSH fitting over 10 years ago.
- Leading European manufacturer known as an innovator of fittings.
- Currently supplying the American market via licensing agreements for brass push fittings.
- An Aalberts Industries Company

- Global leader in fittings, producing approximately half a billion units annually.
